Module Checkage

Validation of the age before shop access by categories, pages or in full.

On the whole shop:
The verification will be activated on the whole shop

On certain categories or pages:
The verification will be activated on the selected categories or pages.

- Possible verification pages:
Bestsellers
Promotions
New products
Suppliers
Brands
CMS

- Categories:
Checking according to the selected categories.
If the default category of a product is selected, direct access to the product will also be controlled.

Options of the "Checkage" module:

- Choice of minimum age
- Display or not logo
- Select date format (DD/MM/YYYY - YYYY/MM/DD - MM/DD/ YYYY) for entering the date of birth
- Additional text with text editor
- Activate or not the verification on the whole shop
- Checking by categories or pages
- Display of the minimum age at the front office

Popular functionality:
The customer just has to enter his date of birth.
Form fields automatically switch from one form to another.
Validation of the date is done automatically without a click
